

TECH⁴
BIOWASTE

A Dynamic Database of Relevant Technologies of Biowaste Utilisation

Biowaste utilisation is key for a circular economy. Which technologies are best suited to turn a specific biowaste stream into value?

About the Project

Tech4Biowaste develops a database on biowaste valorisation technologies. It covers technology readiness levels 4 and higher, relevant feeds and products. The database will contain up-to-date information, will be user-friendly, well-maintained and accessible to everybody.

We Need Your help!

The Tech4Biowaste technology database is currently under development. So get in touch and become a part of our community!

No Time to Biowaste!
